

CURTAIN

Secured e-locker in workstation

- Safeguard your intellectual properties
- Prevent unauthorized use of design files
- Prevent design files from leaking to competitors

- **Protect your investment in R&D**
- **Differentiate your products from competitors**
- **Safeguard your intellectual properties**
- **Expand your business without worrying security**

Do you:

- have problems in protecting your intellectual properties?
- want to prevent design files from being copied to external sources?
- want to stop design files from leaking to your competitors?
- want to increase your investment in R&D to differentiate your products?
- want to develop ODM and OBM business?

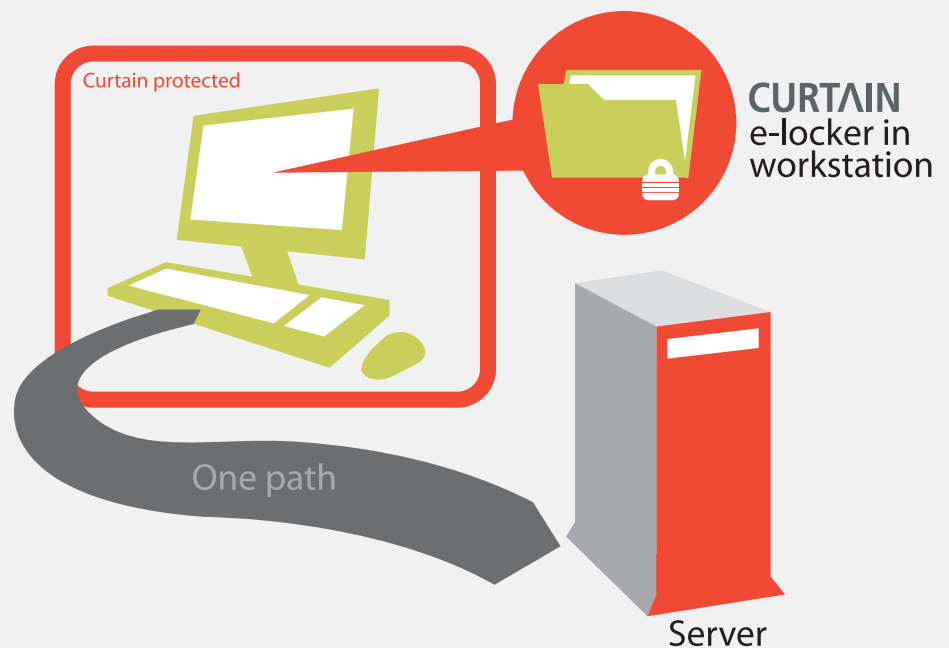

Then **CURTAIN** is the unique solution!

Curtain is a data security system that prevents your design files from leaking out of the company. Curtain allows users to access design files by using corresponding CAD software, such as AutoCAD and SolidWorks. However, users can be controlled NOT to > print > save as > send files to external sources, such as floppy disk, usb disk, CDR, web mail.

Curtain Technology creates a special directory in client machine. Such directory is called "*Protected Directory*". When users access design files stored in server, files will be automatically downloaded to client's Protected Directory. Users can do anything inside Protected Directory (such as New Copy, Rename, Delete, Edit), but they cannot copy files from Protected Directory to external sources. If users make modifications on downloaded files and they want to update server copies, files can be uploaded to pre-defined server location.

Curtain Modules cover the most popular CAD/CAM software, such as AutoCAD, SolidWorks, Unigraphics, Pro/E, etc. Corresponding modules are required to protect corresponding file types. To check full list of Curtain Modules, please contact our resellers.

CURTAIN

用户端上的

安全区

- 保护企业的知识产权
- 防止不恰当使用设计图档
- 防止设计图档外泄或被盗用

Secured e-locker in workstation

用户端上的 安全区

你是否：

- 在保护企业知识产权的问题上遇到困难？
- 想防止设计图档被复制到企业以外？
- 想阻止设计图档外泄到企业的竞争对手中？
- 想企业的产品与众不同，在市场中突围而出？

CURTAIN 是你的最佳解决方案

Curtain是一个用户端上的资料保安系统。Curtain 防止设计图档外泄或被复制到企业以外的地方，用户可以使用相关的设计软件来阅读或修改图档，例如：AutoCAD、SolidWorks等。但Curtain可以防止她们列印、另存新档、复制档案到企业之外，例如：磁片、USB盘、光碟等。

Curtain Technology会在用户端上新增一个特别的文件夹，此文件夹称为安全区，当用户需要使用设计图档时，档案会自动从企业的伺服器中下载到用户端上的安全区内。在安全区内，用户可以使用任何功能来处理档案 (例如：新增、重新命名、删除、修改图档等)，但是她们不能从安全区中复制档案到企业以外的地方。假如用户对下载的档案作出修改，并想更新在伺服器中的版本，在安全区内的档案可以上载到伺服器中预先设定好的位置。

Curtain Modules支援市面上大部份流行的设计软件，例如：AutoCAD、SolidWorks、Unigraphics、Pro/E 等。用户只需要安装相关Curtain模组来保护相关设计图档。有关资料，请联络我们的代理商。

令企业的产品与众不同，在市场中突围而出
保护企业的知识产权
保护企业在产品研发及开发的投入
令企业在不需要担心保安问题下茁壮成长
